

Okan Emre Koca

Full Stack Developer

About me

I'm a 21 years old full stack developer focused on building practical, reliable solutions across the tech stack. I approach each project as an opportunity to learn and improve through hands-on experience.

Education

Computer Science

42, Paris — May 2024 - Present

I completed École 42's rigorous common core curriculum in just 5.5 months, a program typically taking 1-2 years—graduating as the top student in my cohort through consistent high performance across all projects

Projects

Matcha

Full Stack Dating Web Application - 42 Advanced Project

A full-stack dating web application built with TypeScript, React, Fastify, and Socket.IO.

- Architected full-stack dating platform, featuring authentication, real-time chat and smart matching

Transcendence

Multiplayer Pong Platform

Multiplayer Pong platform (vanilla JavaScript, Django, Docker)

- Built real-time social features including chat and friend system
- Implemented optimized game networking for responsive multiplayer matches

Mail0 - Open Source Contribution

Gmail Alternative

Contributed to Mail0, an open-source Gmail alternative.

- Enhanced email threading system for improved conversation visualization
- Contributed UI improvements focused on responsive design and user experience

Le Musée Digital

Mobile Art Guide

Mobile-first museum guide (React, OpenAI APIs)

- Built real-time artwork recognition with multimodal AI interaction pipeline
- Created seamless voice-interactive experience for artwork exploration
